

IDAHO OIL AND GAS CONSERVATION COMMISSION
Application For Permit to Drill, Deepen or Plug Back

APPLICATION TO: Drill ☐ Deepen ☐ Plug Back ☐

NAME OF COMPANY OR OPERATOR: _____ Date: _____

Address: _____

City: _____ State: _____ Zip Code: _____ Telephone: _____

Distance, in miles, and direction from nearest town or post office: _____

DESCRIPTION OF WELL AND LEASE

Name of Lease: _____ Well Number: _____ Elevation (ground) _____

Well Location: Section: _____ Township: _____ Range: _____ (or block and survey)

(give footage from section lines): _____

Field and Reservoir (if wildcat, so state): _____ County: _____

Nearest distance from proposed location to property or lease line: _____ feet

Distance from proposed location to nearest drilling, completed or applied for on the same lease: _____ feet

Proposed depth: _____ Rotary or cable tools: _____

Approx date work will start: _____ Number of acres in lease: _____

Number of wells on lease, including this well, completed in or drilling to this reservoir: _____

If lease purchased with one or more wells drilled, complete the following information:

Purchased from (name) _____

Address of above _____

Status of bond _____

Remarks: (If this is an application to deepen or plug back, briefly describe work to be done, giving present producing zone and expected new producing zone) _____

CERTIFICATE: I, the undersigned, state that I am the _____
of _____ (company) and that I am
authorized by said company to make this application and that this application was prepared under my supervision and
direction and that the facts stated herein are true, correct and complete to the best of my knowledge.

Date: _____ Signature: _____

Permit Number: _____ Approval Date: _____ Approved by: _____

NOTICE: Before sending in this form, be sure that you have given all information requested. See instructions on back.

INSTRUCTIONS

READ CAREFULLY AND COMPLY FULLY

Attach a survey plat or map, preferably on a scale of one (1) inch equals one thousand (1,000) feet, prepared by a licensed surveyor or engineer, which shows the proposed well location. The survey plat or map must show the location of the well with reference to the nearest lines of an established public survey. For directional wells, both surface and bottomhole locations should be marked.

Show distances of the proposed well from the two nearest lease boundary lines, if applicable, and from the nearest wells on the same lease completed in or being drilled to the same reservoir. If the well location requested is not in conformance with the applicable well-spacing rules, show all off-setting wells to the proposed well, and the names and addresses of all adjoining lease or property owners.

If a plat or map is filed for the purpose of designating the drilling and producing unit, or proration unit, on which the proposed well is to be drilled, the boundaries of the unit shall be shown, as well as the boundaries of all other units attributed to other wells on the same lease completed in or being drilled to the same reservoir. The acreage contained within each unit shall also be shown.

Do not confuse survey lines with lease boundary lines. The plat or map should show your entire lease if possible. If it is not practical to show the entire lease and the plat or map shows only a section, block or lot out of your lease, you should clearly indicate the plat or map only covers a portion of the lease.

NOTE: It shall be the duty of any person, operator or contractor drilling an oil or gas well or drilling a seismic, core or other exploratory hole to report to the Commission all fresh water sands encountered; such report shall be in writing and must give the location of the well or hole, the depth at which the sands were encountered, and thickness of such sands, and the rate off flow of water, if known.
